

Field Trip April 17, 2010

Lords Corners (Horn Coral) 9 members attended and found plenty of coral, buckets.

A little brisk that morning but no snow or rain.

If you look close you can see some of the coral in the lower right corner before they scavenage it up.

Their collecting got the best of them that it took two to carry it.

Fayetteville, NY
(Selenite)

At the dig site.

Before they left, they had to rearrange their buckets so they could get it all in.

I would like a good look at that slab in the pickup.
